## Advantages

 Involute blade

 Weber Hygiene Design

 Variogripper

 Quick set-up time

 SprayTech

 Automatic loading

# Slicer TS750

**Application optimized, compact, powerful:** The Weber Slicer TS750 is specialized on the processing of short products such as bacon or ham.

In contrast to conventional slicers, the TS750 does not convey the products to the slicing level via several conveyors connected in series. At the heart of Weber's new development, there is a new product feeding system that is impressive in its simplicity: a toothed belt drive with drivers. And, as always with Weber, in a simple and extremely compact design.

GripnGo reloading function

VarioFeed Product Feeder

ContiFlow - Slicing without reloading gaps

The TS750 comes in a variety of configurations: from a very simple version for endless slicing to high performance applications including product scanner and true dual line capability.
